

- ***ENVIRONMENT MINISTRY***

Many people are needed to help with the environment of the church. The purpose of Environment is to create a worship space that is welcoming, pleasing to the eye, and above all gives glory to God. This might include a variety of needs such as: preparing the worship space for the different liturgical seasons, watering and caring for the flowers and plants, etc.

The Environment Ministry is to enhance the interior of the church in an artful and spiritual manner following the liturgical calendar to lead people to prayer without distraction.

Different seasons of the year require certain colors and decorating. Before each season or special event, we gather together and change colors, plants, flowers and orders of service.

This does not require a special talent, the Holy Spirit leads us and we surprise ourselves with what we accomplish.
